Hyderabad, India

.NET BACKEND DEVELOPER

SUMMARY

Results-driven .NET Backend Developer with 2 years 10 months of hands-on experience building enterprise-grade RESTful APIs, fintech payment integrations, and data analytics platforms. Proven track record at Wings Infonet Pvt Ltd delivering NPCI/NBBL B2B payment services, high-performance ClickHouse and DuckDB analytics backends, and WinForms full-stack modules. Adept at SQL Server optimization, Agile delivery, production bug fixing, and rapidly adopting emerging technologies, including Microsoft Agent Framework. Passionate about engineering reliable, scalable, and secure backend systems.

EXPERIENCE

Wings Infonet Pvt Ltd

07/2023 – Present

.NET Backend Developer

Hyderabad, India

- Designed and delivered 20+ production-grade ASP.NET Core Web APIs for ERP Finance and Operations modules serving live enterprise clients.
- Built the NPCI/NBBL B2B payment integration end-to-end, enabling secure electronic exchange of Sales, Purchase, Credit/Debit Notes, and Payment invoices between registered business IDs.
- Engineered the Analytics Dashboard backend using ClickHouse and DuckDB as high-performance data warehouses; implemented server-side filtering, aggregation, and page-level redirection logic consumed by Angular/DevExpress chart components.
- Led full-stack WinForms module development, including form design, data binding, and backend API wiring for internal business tools.
- Reduced API response times by approximately 25% through targeted SQL Server index optimization, query rewriting, and caching strategies.
- Integrated Angular frontend with backend APIs; enforced centralized logging and global exception-handling middleware for faster incident resolution.
- Triaged and resolved production bugs across existing ERP modules, improving system stability and reducing support tickets.
- Started adopting Microsoft Agent Framework to prototype AI-assisted ERP workflows as part of continuous skill development.

SKILLS

FRAMEWORKS

ASP.NET Core (.NET 6/8) Web API WinForms

DATABASES

MS SQL Server ClickHouse DuckDB Stored Procedures Indexing
Query Optimization

TOOLS & DEVOPS

Git Swagger/OpenAPI Postman IIS

LEARNING

Microsoft Agent Framework AI-Assisted Dev Workflows

PROJECTS

NBBL / NPCI B2B Payment Integration Module

Implemented NPCI B2B services within ERP to enable fully automated invoice exchange (Sales, Purchase, Credit Note, Debit Note, Pro Forma, and Payments) between business IDs, directly linked to NPCI's B2B linked payments network (NBBL). Secured all endpoints with JWT authentication and role-based authorization; handled failure retries and reconciliation flows.

Analytics Dashboard Module (Internal BI Platform)

Developed the full C#/.NET backend layer powering an in-house Power BI-style dashboard with bar charts, line charts, KPIs, and dynamic filters. Integrated ClickHouse (OLAP) and DuckDB as query engines for sub-second analytical queries across millions of rows; also used MS SQL Server for transactional data. Built page-redirection and drill-down navigation APIs consumed by the Angular frontend, with DevExpress chart components for rendering.

ERP Finance & Operations API Suite

Architected and delivered a comprehensive suite of RESTful APIs covering accounting, inventory, and operations workflows within the ERP platform. Optimized SQL Server stored procedures and introduced covering indexes, reducing critical query execution time significantly.

WinForms Full-Stack Internal Tools

Designed and developed WinForms-based desktop modules for internal business processes, including data-entry screens, reports, and backend API calls. Maintained existing legacy modules, fixed UI/UX issues, and migrated business logic to backend APIs where appropriate.

STRENGTHS

Payment APIs

NPCI/NBBL integration expertise

High-Performance Databases

ClickHouse · DuckDB · SQL Server

End-to-End Delivery

API → DB → WinForms → Angular

Analytics Platforms

Power BI-style dashboards and filters

Continuous Learning

Microsoft Agent Framework and AI tools

EDUCATION

Loyola Degree College (YSRR), Pulivendula

2018 – 2021

B.Sc · CGPA: 6.0 / 10.0
